

LE1750

A striking, ultra-wide fireplaces designed for large-scale interiors, offering a sweeping flame display that anchors even the most expansive spaces.

INBUILT HOLOGRAPHIC ELECTRIC FIREPLACE

Unmatched Realism

Holographic technology combined with precision flame-mapping projects dynamic flames, sparks, and flickers onto lifelike logs and embers - recreating the depth, movement, and authenticity of a real wood-burning fire.

Installation Flexibility

No flues, vents, or consent required – offering complete freedom to install anywhere and integrate seamlessly into any surround material or design.

Effortless Ambience

This fireplace delivers warmth when needed, or ambience with flame-only mode – giving you year-round flexibility and effortless control.

FIRE BY

HEAT OUTPUT	1.5 or 3kW

DATA BADGE	Inside appliance, upper left corner

FIREPLACE SIZE	1812w x 545h x 439d mm
CAVITY OPENING	1832w x 555h x 450d mm
VIEWING AREA	1756w x 406h mm
TV CLEARANCE	100mm above viewing area

The LE1750 is an indoor holographic projection fireplace designed to be built into a false cavity - from standard building materials.

The appliance is to be installed prior to any wall linings or finishes.

For optimal viewing, the LE1750 base should be 300mm above the floor.

Wall linings or finishes can be of any thickness, and any standard building material may be used. If finishes extend beyond the 14mm viewing area trim, consider the visual impact of the material edge.
